

## Male description of *Eutetrappa velutinofasciata* Pic, with a new synonym (Coleoptera: Cerambycidae: Lamiinae: Saperdini)

*Eutetrappa velutinofasciata* Pic was established for a unique female specimen from Beijing, China. Breuning (1952) transferred it to the genus *Paraglenea* Bates based on one additional female specimen from Inn-shan (China: Inner Mongolia), a transfer which was not widely accepted. We describe the male and postulate the host plant for the first time. Habitus photographs as well as illustrations of the male genitalia and claws are presented. After careful examination of both the holotype of *E. velutinofasciata* Pic, and the holotype, one paratype, as well as a series of specimens including males and females of *Paraglenea nigromaculata* Wang et Jiang, *P. nigromaculata* Wang et Jiang was found to be a junior synonym of *E. velutinofasciata* Pic.

### Materials and Methods

Most specimens examined are deposited in the Insect Collection of the Institute of Zoology, Chinese Academy of Sciences, Beijing. The holotype of *Eutetrappa velutinofasciata* Pic was borrowed from the Muséum national d'Histoire Naturelle, Paris. Types of *Paraglenea nigromaculata* Wang et Jiang are deposited in the insect collection, Southwest Agricultural University, Chongqing, China. Dr. Li Chen examined the holotype and exchanged one paratype.

### *Eutetrappa velutinofasciata* Pic, 1939 (Figs. 1–3)

*Eutetrappa velutinofasciata* Pic, 1939: 2 (type locality: Beijing).

*Paraglenea velutinofasciata*: Breuning, 1952: 130.

*Paraglenea nigromaculata* Wang et Jiang, 2002: 146 (type locality: Inner Mongolia, Shanxi, Shaanxi). **syn. nov.**

**Type material:** holotype (of *Eutetrappa velutinofasciata* Pic), female, **China:** Beijing, VI.31, leg. E. Licent; holotype (of *Paraglenea nigromaculata* Wang et Jiang), male, **China:** Shaanxi, Yan'an [36°35'N, 109°28'E], 1980, leg. Yizhi Sun; paratype (of *Paraglenea nigromaculata* Wang et Jiang), 1 female, **China:** Inner Mongolia, Huhhot [40°52'N, 111°39'E], Datai, 1964.VI. 21, leg. Xinhua Liu.

**Additional material: China:** 1 male, Heilongjiang, Wuying, 1980.VII.18; 1 female, Inner Mongolia, Huhhot, 1961.VIII.4 (host plant: *Populus*); 1 male, Inner Mongolia, Chayouzhongqi, 1981.VII.15; 1 male, Inner Mongolia, Wumeng, 1981.VII.14 (host plant: *Populus*); 1 female, Beijing, Badaling, alt. 700 m, 1961.VIII.3, leg. Xuezhong Zhang; 1 female, Beijing, Badaling, alt. 700 m, 1964.VII.23, leg. Subai Liao; 1 male, Hebei, Mt. Xiaowutaishan, Huichuan, alt. 1400 m, 1964.VII.14, leg. Yinheng Han; 1 female, Hebei, Xuanhua, alt. 640 m, 1964.IX.17, leg. Youheng Wang.
