

Checklist of the Cerambycidae and Disteniidae (Coleoptera) of Costa Rica

Frank T. Hovore, 2003

Taeniotes preclarus Bates, mating pair, Monteverde, Costa Rica (F.T. Hovore)

The following checklist has been edited from the larger Checklist for the Western Hemisphere (Monné and Hovore, 2003), to provide an organizational reference for the collections of Costa Rica. It originally was assembled as an annotated working list in June, 2001, to provide a baseline for collection organization and field studies at the National Institute for Biodiversity (INBio), and University of Costa Rica (UCR). For the most part, this list does not anticipate new taxa, except where such were in manuscript at the time of this compilation; these are listed beneath their respective genera as “n.sp.” Many other new taxa are at hand in collections, awaiting description, and these shall be added as they are published. I am very grateful to Humberto Lezama (Museo de Insectos, UCR) for permit assistance, the use of specimens in the excellent UCR collection, and many other valuable contributions; Angel Solís and Alvaro Herrera of INBio, for funding, specimens loans, and the opportunity to utilize and organize the vast INBio collection; Henry Hespenehede (OTS, UCLA), John Chemsak (UCB), Keve Ribardo (CAS), Jim Cope, Luis Diego Gomez (OTS, Las Cruces), Jack Longino and the ALAS lab staff: Danilo, Ronald, Maylin, and Nelci (OTS, La Selva), for specimen data and assistance; the Tropical Science Center, Monteverde, for field study permission and assistance; Maria Marta Chavarria and Dan Janzen, for their friendship, inspiration and collection assistance in Santa Rosa National Park; Dick Penrose, Pat Sullivan, Ian Swift, and the late Ed Giesbert for specimen data, field camaraderie, and a thousand other important contributions. The Costa Rican Ministerio del Ambiente y Energia [MINAE] is very gratefully acknowledged for providing collecting and export permits.
